

# Xi'an International Airport T3

### Challenges/ objectives

- Because of the growing transportation requirement, the second phase of the expansion project at Xi'an Xianyang International Airport was carried out in March, 2011.
- The first airport in the Western Aviation Group to use digital solutions.

### Solution

- Bosch selected the best products and solutions for this project, including BVMS, more than 400 sets of indoor/outdoor encoders, nearly 1,500 sets of cameras covering Indoor/Outdoor PTZ dome camera, Indoor dome camera, HD camera, etc. As well as installing over 3,500 sets of ceiling loudspeakers for the Public Address system.

### Customer benefits

- Stable security systems, provide reliable products and solution
- Passengers can listen clearly through speakers
