

Prince of Songkla International Conference Centre Security over the IP Network

BOSCH

Invented for life

Industry:

Congress & Exhibition centre

End User:

Prince of Songkla International Conference Centre (PSUICC)

Established in commemoration of the 60th Anniversary of His Majesty, the King's Accession to the Throne, PSUICC is Thailand's newest international convention centre and the largest in the country's southern region. The centre is in close proximity to a full spectrum of modern amenities and features splendid southern-style architecture. Moreover, PSUICC is well-equipped with fully functional state-of-the-art multi-media technology, which caters to all types of activities. In all, the state-of-the-art convention centre is the pride of the south.

Business Objective:

In order to provide a convention centre fit for an international-scale and capable of hosting the full range of leading-edge local and international events, PSUICC needs high quality technological products for their centre. This includes security and communication systems such as Congress, Prosound and CCTV Systems

Solution:

To suit their demands, PSUICC specially chose Bosch Security & Communication Systems together with Libra Network and Security Co. Ltd. to install CCTV, Congress and Prosound Systems in the centre. The purpose of the CCTV system is to observe, recognise and identify. The images are relayed to the control room, where they are shown on the video wall to the relevant personnels. The system provides a complete overview of what is happening in the centre, and specific areas may be enlarged for a closer look at all possible implementable security measures.

The DCN wireless systems installed in every conference room contains all facilities required for achieving full control of meetings and discussions without the need for an operator. The system can also be easily extended, and provides ease of use for its various functions and unique features. This system is further complemented with the ideal state-of-the-art Prosound system which promises uniform excellence.

Prince of Songkla International Conference Center

In addition, the intrusion system with 20 PIR detectors protects the building from theft and unauthorised access.

Result:

PSUICC is highly pleased with the benefits of this flexible and user-friendly conference system which has tremendously facilitated the numerous meetings that take place in the centre every day.

Hence, thanks to the reliability of the products and the excellent work of the Bosch dealer, Libra Network and Security Co., Ltd., PSUICC is now well-equipped with Bosch's high-quality products and fully trusts the experience and competence that comes with it.
