

Case study

Yves Rocher, Thailand

Key Objectives

- A video surveillance system to allow central monitoring of all retail outlets across Thailand
- Monitoring vital areas of the store, such as the cashier, display shelves and entrance

Key Challenges

- Yves Rocher required a convenient system whereby footage from all stores can be easily archived and viewed via a single PC

Solution

- The Bosch Video Client (BVC) allows the security team to view images from multiple cameras on a single PC monitor and easily archive video clips

Customer benefits

- Allows for 24/7 surveillance
- Ease of both locating required footage and maintaining security
