End User:

Kharkiv International Airport was one of the most important enterprises in the Slobozhanshchyna capital region of Ukraine, which was undergoing reconstruction as part of the preparations for the final games of the 2012 UEFA European Championship. It is equipped with the necessary number of state and customs border crossing channels, as well as aviation safety control facilities, and facilities that ensure comfortable movement for handicapped individuals through the terminal. The new terminal has a capacity to handle 1,300 passengers per hour.

Business Objective:

To equip the new terminal with all of the required security system facilities, including CCTV systems, and a data processing center.

Solution:

The installation company created a building infrastructure which includes engineering and technology systems, information and communication systems, and an integrated security system. Implemented within the terminal is a surveillance system, a data center, a telecommunications network, and more.

The following systems and solutions have been installed:

CCTV:

78 pcs FLEXI COL H264 9-22 PAL POE SMB
10 pcs NWC-0495 DINION XF IP video camera with day/night mode
32 pcs Dinion 720p with IVA READY

Software:

1 pcs BVMS Professional 2.3, 8 Ch 2WS 1DVR 1 Kb (e-license)
121 pcs BVMS Channel (cam/dec) Expansion V 2.3 (e-license)
1 pcs BVMS Forensic Search Expansion V 2.3 (e-license)
3 pcs BVMS Workstation Expansion V 2.3 (e-license)
30 pcs IVA 4.0 FOR IP CAMERA/DOME

Kharkiv International Airport

Result

CROC created one of the most high-tech enterprises, in which information and communications technologies are an essential component of this new terminal. The technological infrastructure of Kharkiv International Airport provides passengers and visitors with a safe and comfortable experience on the summit.
