

# A Fine Bouquet of Bosch systems for The Bahrain Crowne Plaza Hotel and Conference

**BOSCH**  
Invented for life

## Industry:

Hotels and Recreational Facilities

## End User:

Crowne Plaza is a flagship brand of hotels owned by the InterContinental Group which has properties all around the Globe.

In this context, the Bahrain Crowne Plaza is a luxury property which is situated in the business district of Manama, providing a complete range of amenities to its guests.

In total, the hotel has 300 guest rooms. Moreover, it includes a separate conference centre with 7 small meeting rooms and 1 large banquet hall which can be divided into 4 sections.

## Business Objective:

In order to offer high standards to international business guests, Crown Plaza was looking for a high quality solution from a single vendor.

According to the hotel's requirements, the following items were demanded:

- Background music, a system in charge of hotel announcements as well as the evacuation of the hotel and conference centre
- Modular PA & Conference systems permitting to subdivide the large conference centre in up to 4 independent sectors depending on hosted events
- A comprehensive CCTV system for the entire property

Bosch products were finally chosen due to the unique brand reputation, its ease of operation and the proved quality of performance.

## Solution:

To realize the varied objectives of the hotel offering highly reliable and very flexible solutions, a full range of Bosch products for public address, surveillance, background music and evacuation was needed.

Thus, the Conference system CCS800 Ultra which even offers the opportunity to be prospectively connected to an interpretation system was used for the Conference Centre.

A total of 28 consecutively operating daisy-chained DIVARs were provided to cover the essential security needs. For the observation of people's movement, 12 outdoor fixed camera assemblies with varifocal lenses were installed. The security within the lobby area of the hotel and the conference centre was supervised through 14 cameras. For the monitoring of the underground car park 2 cameras were used.

Crowne Plaza - Bahrain

In order to fulfil the requirements for background music, announcement and evacuation Bosch's Praesideo System was deployed.

Mohammed Fakhroo & Bros., Bahrain was finally commissioned to provide the complete solution based on a comprehensive portfolio of Bosch products.

## Result:

The keenness of the customer to find a versatile, flexible and reliable solution of a world class manufacturer supplying all the relevant products necessary for installation coupled with the importance of having a competent, fully trained and authorised distributor who is in charge of the supply, the installation and maintenance of the various systems, automatically led to the choice of Bosch and Mohammed Fakhroo & Bros. .

According to Mr. Jose Pudukkaden, chief engineer of the property, the solutions and local services are: "Dependable, reliable, and fully trustworthy."

Thus, indeed a dependable choice for a demanding customer!
